

# Children's Hospital of Colorado NES Clinic

## Clinic Info

- The Children's Hospital of Colorado NES Clinic is a multidisciplinary clinic that treats children and teens, ages 18 and below, who have been diagnosed with Non-Epileptic Seizures (NES).
- The clinic is a **one-time consultation clinic** that occurs virtually only on Monday afternoons 2x per month.
- At the clinic, the patient will see a pediatric epileptologist, neurologist, and psychiatrist, along with a social worker.
- We will help you develop an action plan, connect you to an outside therapist, and provide education about the NES diagnosis.

## Scheduling

- Patients must be established with outpatient neurologic care at CHCO prior to being seen.
- After establishing care with a CHCO neurologist, the neurologist will determine if a referral should be made to our NES clinic and recommend an Epilepsy Monitoring Unit (EMU) visit, as appropriate.
- To make an appointment to be seen in the pediatric neurology outpatient clinic, please call (720)-777-6895.
